SUMMARY

4+ months experienced web and application development professional with a demonstrating capability in designing & maintaining software and website. Adept at collaborating with a high-performing team of individuals as part of spearheading and facilitating the product-development life cycle. Proficient in understanding clients' requirements while monitoring timely delivery to ensure maximum client satisfaction.

KEY SKILLS

• Software/Application Development & Maintenance • Website Development • Webpage Optimization • Team Leadership • Agile Methodology • Managerial & System Support • Process Optimization • Coding • Client Requirement • User Interaction • Debugging • Compliance • Application Design

TECHNICAL SKILLS

- **Web Design**: HTML5, CSS, JavaScript, Boot Strap, Node JS
- **Frameworks:** AngularJS, React
- **Microsoft Tools:** Word, PowerPoint, Excel
- **Version Control Systems**: Git, GitHub
- **Databases**: SQL & No SQL
- **Platforms**: Linux and UNIX, iOS, Android, Windows

EDUCATION

Full Stack Web Developer INTERSHIP Program
Edureka

Jun '21 - Dec '21
Online

- Relevant Courses:
  - Deploying the first website with MERN | Creating Web Pages with HTML | Styling Web Pages using CSS
  - Css3 Effects and Animation | Handling events with JavaScript | Twitter Bootstrap 3 | Ajax, Google APIs

B.E in Computer Science
Anna University college of Engineering

Aug '15 - Apr '19
TN, IN

- Secured 65.4%

PROFESSIONAL EXPERIENCE

Full Stack Developer Internship
Edureka

Jul '14 - Oct '20
New Delhi, IN

Edureka provides end-to-end digital, technology, and marketing services with 300+ courses in the country

Web Application Development
- Developed **5** web **applications** by deploying frameworks, languages, and platforms such as JavaScript, NoSQL, and HTML
- Conducted thorough **research** on **information needs**, systems flow, and data usage as part of creating software solutions
- Structuring **back-end codes** in Nodejs for data efficiency

System Programming & Maintenance
- Oversaw the maintenance and programming of enterprise software systems including UI
- Ensured adherence to programming standards encompassing production, productivity, and **quality standards**

Team Leadership & Coordination
- Spearheaded end-to-end **product development** and trained a team of ~12 for timely & quality delivery
- Provided guidance for building development capabilities while serving as the POC for ensuring issue resolution
- Coordinated with the top-level professionals senior management of **25+ members** in an **Agile** development environment to support short iterative cycles

Process Optimization
- Analyzed web applications to identify scope for **improvements** and implementing new technology to enhance design & application patterns
- Delivered recommendations across new practices, processes, **metrics,** and models for modeling the business processes

PROJECTS

- **Project 1:**
  Human Emotion Recognition System Using machine Learning
  - This process is used to Analysis the video Frames to Identify the Emotion the Describe in the Videos
  - Using Convolutional Neural Net Work(CNN)
- **Project 2:**
  MERN Interactive Application |E-com shopping
  - Developed an interactive **Ecommerce**-**Shopping** application in an agile team environment
  - Deployed GitHub and Heroku
  - **Automated** the Online Dress shopping platform for Quick buy the Customers Needed with the latest technology React and using MongoDB
  - www.thesouldedstore.com
- **Project 3:**
  MERN Interactive Application | Online Food Delivery
  - Developed an interactive **Ecommerce**-**Food Delivery** application in an agile team environment
  - Deployed GitHub and Heroku
  - **Automated** the Online Food shopping platform for Quick buy the Customers Food Choices on Favorite Restaurants with the latest technology React and MongoDB
  - www.zomato.com
